IMEX ARMS, has served only the Defense Industry with the products it has produced so far, and is also the only company that produces bullet steel cores in the private sector. We are the subcontractor of the Machinery and Chemical Industry, which is an institution of our state, and we produce in the field of Military Ammunition Spare Parts (Bullet Steel Cores). Our company, which has the Facility Security and Production Permit Certificate and has international validity, also exports to various countries. We are a small-scale, with 15 employees, company with strong experience and high working capacity.

12.7 X 99 M33 FMJ PRESS

We brought the growth target to the forefront by including the 12.7 mm FMJ production line, which was provided as a result of the investments it made in 2019 and 2020. Our company, which continues to produce in accordance with its standards with its ISO 9001:2015 Quality Certificate, has always aimed to keep the quality at the highest level.
