

IMEX stands for comprehensive solutions regarding ammunition.

Together with our international customers and their requirements, we have specialized in special solutions in the NON-LETHAL ammunition sector. Be it FORCE-2-FORCE marker training ammunition or ANTI-RIOT ammunition, BLANK ammunition - we offer a range of individual solutions.

Did you know that IMEX is the second largest European manufacturer of LINKS?

AMMUNITION

MT-X

MT-X

MARKER TRAINING AMMUNITION

MT-X is the safest alternative in the field of marker-training systems, designed for safe and realistic force-on-force and force-on-target shooting. The non-toxic marking compound used in our cartridges provides excellent visibility and is easily washable. Different bullet colors identify the training units. Featuring health and environmentally friendly primers as standard, our system boasts compatibility with widely used platforms like Simunition FX ammunition and conversion kits. With reliable operation, good accuracy, and clearly visible hit markings, our solution prioritizes safety with short distances. The complete system, including weapons, conversion kits, marker training ammunition, protective equipment, and training, is not only effective but also reasonably priced. Embrace a training experience that goes beyond expectations.

FEATURES:
Indoor / Outdoor use
Low energy hit
Shot by auto reloading

AREX MT-X
9mm - CIP CERTIFIED

AREX MT-X
5.56mm

We offer a range of conversion kits for various commercially available weapons, as well as solutions based on our own weapon types. 5.56 is also available on individual request (B2B).

COLOR OPTIONS: RED BLUE YELLOW WHITE NON-MARKING

AMMUNITION NL-X

NL-X NON-LETHAL AMMUNITION

Available in a variety of calibers, NL-X ammunition offers a wide range of applications. A solution to offer LE and Security forces an alternative to gas and electro-shock. Non-Lethal, with soft plastic bullets, NL-X is often the best option for riot control, anti-piracy, self-defense and other situation where escalation of force are essential. NL-X is also suitable for in/outdoor short-range training. Always when real ammunition would not be the appropriate means.

AVAILABLE CALIBERS

9x19mm
5.56x45mm
7.62x39mm

COLOR OPTIONS:

BLUE CARTRIDGE / YELLOW RUBBER BULLET

FEATURES:
Indoor / Outdoor use
Low energy hit
Shot by manual reloading

DETAILED INFORMATION

DESCRIPTION	CALIBER	SKU	NSN	UNIT / PACKAGING
NL-X 5,56x45	5,56 x 45	601801	/	720 rds. / Bulk, cardboard box
NL-X 7,62x39	7,62 x 39	602656	/	540 rds. / Bulk, cardboard box
NL-X 9x19	9 x 19	601802	/	1000 rds. / Bulk, cardboard box

Please note (B2B / B2G) that the ammunition requires individualized powder loads with regard to the weapon types and barrel lengths used. In order to achieve the best performance, a detailed weapon description is necessary to adapt the loads specifically and effectively. Please contact us for your individual requirements.

AMMUNITION

BLAN-X

BLAN-X POLYMER BLANK AMMUNITION

No maneuver is complete without simulating real-life conditions in the field. This also includes the acoustic simulation of real combat situations with full functionality of the weapons used. AREX Polymer BLAN-X is one of the best alternatives. We are probably the world's utmost expert in blank ammunition for training purposes enabling our users the most realistic training situations, regardless of the conditions. We offer a wide range of calibers - not only for professional military use, but also for use in warning or chasing away flocks of birds, for example at airfields.

AMMUNITION

DRILL-X

DRILL-X PRACTICE AMMUNITION

Every handling of a weapon must be practiced. DRILL-X ammunition enables real-life simulation of loading, magazine filling and repeating with case ejection. It simulates the original weight in the training weapon. With a polymer finish and rubber insert, this drill cartridge is designed not to harm your weapon as you practice drawing and dry firing or just tuning for your best trigger pull. A must have for every professional armorer, gun smith, weapon school, training center and concerned weapon owners. AREX manufactures a wide variety of calibers in different materials.

AMMUNITION

LIN-X

LIN-X

LINKS FOR AMMUNITION

AREX is one of the largest manufacturers of links in Europe with a manufacturing capacity far above 1 billion LIN-X per year! The ammunition chain links seem banal at first glance, but they contain the highest development and manufacturing precision. They must function perfectly at all times, under all climatic conditions, in every conceivable weapon with the right ammunition. They are always used when the requirements are toughest. Ready for belt-fed firearms and heavy guns.
